

Only Flush Toilet Paper!

Due to the Coronavirus pandemic there are currently shortages of toilet paper in stores nationwide.

This may cause you to look for alternative products such as paper towels, facial tissues, baby wipes, flushable wipes, and other similar items.

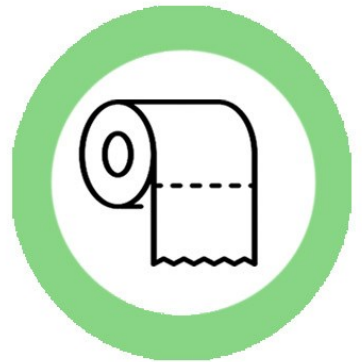

DO NOT FLUSH
Facial Tissue
or Kleenex

DO NOT FLUSH
Paper Towels

DO NOT FLUSH
"Flushable", Baby
or Cleaning Wipes

YES! ONLY FLUSH
Toilet Paper

These products - including those labeled "flushable" wipes - *do not break down like toilet paper* and can cause clogged pipes and sanitary sewer backups, which in turn can cause additional public health and sanitation concerns.

If your unit is determined to be the source of a back-up caused by the disposal of these products, you may be charged for the maintenance repair time and clean up.

Thank you!
